Education

Jorhat Engineering College — Jorhat, Assam
B.Tech in Computer Science and Engineering; CGPA: 7.22/10 — *2024 – 2028*

Technical Skills

Languages: C++ (C++17/20), C, JavaScript, Python, SQL
C++: STL, templates, smart pointers, RAII, memory management, iterators, ranges
Core: Data Structures & Algorithms, OOP
Web & Data: React, Next.js, Node.js, Express, PostgreSQL, MongoDB, Prisma
Tools: Git, Linux, Valgrind, Docker, Cloudflare Workers

Experience

Encamp Adventures — Jun 2026 – Present
Full-Stack Engineer

- Ship production features for a North-East India travel company (23,000+ travellers hosted): a customer booking website and two internal admin systems; 200+ commits since joining
- Built payment and checkout flows (online payments, coupon validation, request-to-book) where pricing and order state must stay correct end to end
- Moved lead filtering from the client to the server so paginated queries return only matching records; added role-based access control and CSV export

MechMate – **mechmate.in** — Aug 2026 – Present
Co-Founder & Software Engineer — *Delhi NCR & Assam*

- Co-founded a doorstep vehicle repair service; co-built its booking, invoicing and profit-tracking platform on Next.js, PostgreSQL and Cloudflare Workers

Projects

Modern C++ Deep Dive | *C++17/20, STL, Valgrind* | GitHub — 2026

- Implemented 25+ focused exercises across pointers, memory management, templates and the STL
- **Memory:** an arena allocator using placement new, cache-line-aligned buffers with `alignas`, an RAII file wrapper, and a `unique_ptr`-owned linked list; found and fixed a seeded leak with Valgrind
- **Templates:** a fixed-size `CircularBuffer<T, N>`, compile-time dispatch with SFINAE and `if constexpr`, variadic fold expressions, and a custom forward iterator usable in range-for
- Benchmarked middle insertion in `vector`, `deque` and `list` (N = 100k) and lookup in `map` vs `unordered_map`

QueueLess – Canteen Pre-Order System | *Node.js, MongoDB, Razorpay* | GitHub | Live — 2026

- Designed an order state machine (paid → preparing → ready → collected) with 3 user roles, a 4-digit pickup code and refunds before preparation
- Verified payment webhooks with HMAC signatures; built sales reports with MongoDB aggregation pipelines; covered the order flow with integration tests

Achievements

- **IndiaSkills National – Top 10** in Web Technologies, representing Assam
- **IndiaSkills Regional Silver Medal** (North-East, 2025–26) and **State Silver Medal** (Assam) in Web Technologies
- **Best Coder (2024)**, Jorhat Engineering College, for competitive programming
- Solved **180+ problems** on LeetCode in C++ (110+ Medium)
- **Harvard CS50x** certificate (C, Python, SQL)
